

Phylogeny, divergence times, and chromosome evolution in Onagraceae

William A. Freyman^{a,*}

^a1600 John F Kennedy Boulevard, Philadelphia

Abstract

This template helps you to create a properly formatted L^AT_EX manuscript.

1. Introduction

blah blah

2. Methods

Supermatrix. If the document class *elsarticle* is not available on your computer,
5 you can download and install the system package *texlive-publishers* (Linux) or
install the L^AT_EX package *elsarticle* using the package manager of your T_EX
installation, which is typically T_EX Live or MikT_EX.

Phylogenetic analysis. Once the package is properly installed, you can use the
document class *elsarticle* to create a manuscript. Please make sure that your
10 manuscript follows the guidelines in the Guide for Authors of the relevant jour-
nal. It is not necessary to typeset your manuscript in exactly the same way as
an article, unless you are submitting to a camera-ready copy (CRC) journal.

Chromosome evolution. The Elsevier article class is based on the standard ar-
ticle class and supports almost all of the functionality of that class. In addition,
15 it features commands and options to format the

- document style
- baselineskip
- front matter
- keywords and MSC codes
- 20 • theorems, definitions and proofs
- lables of enumerations
- citation style and labeling.

3. Results

The author names and affiliations could be formatted in two ways:

- 25 (1) Group the authors per affiliation.
- (2) Use footnotes to indicate the affiliations.

See the front matter of this document for examples. You are recommended to conform your choice to the journal you are submitting to.

4. Conclusion

30 There are various bibliography styles available. You can select the style of your choice in the preamble of this document. These styles are Elsevier styles based on standard styles like Harvard and Vancouver. Please use BibTeX to generate your bibliography and include DOIs whenever available.

Here are two sample references: (Feynman and Vernon Jr., 1963; Dirac,
35 1953).
